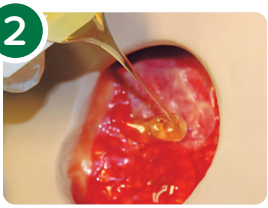
HYCOL® HYDROLYZED COLLAGEN

GEL APPLICATION GUIDE

1

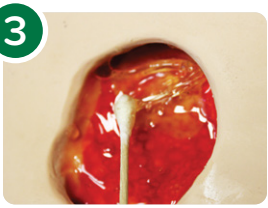
Use the gel on dry or lightly to moderately exudative wounds. For initial application, debride the wound bed of slough and necrotic tissue. HYCOL® Gel should be applied directly to the wound with an applicator of choice.

2



Apply gel to the wound bed. The amount applied depends on the wound depth and size. Initial application may require more gel than subsequent applications.

3



Be sure to cover the entire area of the wound bed and wound margin.

4

Gently push gel into any areas of undermining.

- Apply an appropriate non-adherent secondary dressing
- Reapply a minimum of 2-3 times a week or as necessary

HYCOL® HYDROLYZED COLLAGEN

POWDER APPLICATION GUIDE

1

Use the powder on moderately to heavily exudative wounds. For initial application, debride the wound bed of slough and necrotic tissue. HYCOL® Powder can be applied in targeted amounts using the puffer tip. The tip can also be removed for pouring powder into the wound.

2

Apply powder to the wound bed. The amount applied depends on the wound depth, size and amount of exudate. Initial application may require more powder than subsequent applications.

3

Be sure to cover the entire area of the wound bed and wound margin.

4

Gently push powder into any areas of undermining.

- Apply a secondary dressing appropriate for the level of drainage
- Reapply a minimum of 2-3 times a week or as necessary until exudate is controlled
